

Finding the highest R² value in machine learning.

1.ADA Boosting

random_state	n_estimators	Loss	Result
0	100	Square	0.4156161924241657
100	100	Square	0.436687976622555
100	100	Exponential	0.4857229360725728
100	50	Exponential	0.5795207256610342
100	1	Exponential	0.8512532095909193
42	1	Exponential	0.8457037182041468
100	1	linear	0.8512532095909193

2. XG Boosting

n_estimators	random_state	max_depth	Result
100	42	6	0.8190115094184875
1	100	6	0.3564907908439636
100	10	4	0.8528106212615967
100	5	4	0.8505678176879883
100	5	1	0.7935879826545715

3.LG Boosting

n_estimators	learning_rate	num_leaves	random_state	result
100	0.1	31	42	0.86603193419773
100	1	31	100	0.7876852919994038
100	10	50	100	-4.71899597874734e+68
